

Company Profile

Texplus Fibres (P) Ltd is located in the highly reputed, government approved industrial area of NOIDA near Delhi in India. The Company has taken it upon itself to indigenously produce and provide world class fabric based equipments including import substitutes such as: combat kit and battlefield rig, adventure gear and survival kits that would not only save foreign exchange but also add to the efficiency, comfort and confidence of our individual sports-persons, commandos and operational Teams. The Company is organised with elaborate market research network, highly qualified engineers and professionals, skilled workforce, modern manufacturing technology; a well equipped and scientifically advanced Laboratory with stringent quality testing norms and on-going R&D.

A panel of senior retired officers from the Armed Forces, para-military forces and sports world renders expert advice on practical aspects of various types of equipment. This also helps us to custom design and develop specific products for specific missions keeping in view the futuristic trends, emerging threats and needs of the Forces and law enforcing agencies in a new security environment.

We have tie-ups with Companies of International repute within and outside India to design and manufacture products of the highest quality that compete with the best in the world. Each product has to pass through rigorous tests and trials before our R&D standardises it. Once standardised, there is no room for any dilution in the standards of the product.

We are already competing with the best in the world and have carved out a niche of Quality. Choose what you will at home or abroad!

We are a better option!
